- Lead Generation Channels
- Customer Success Retention

## **6 Summary**

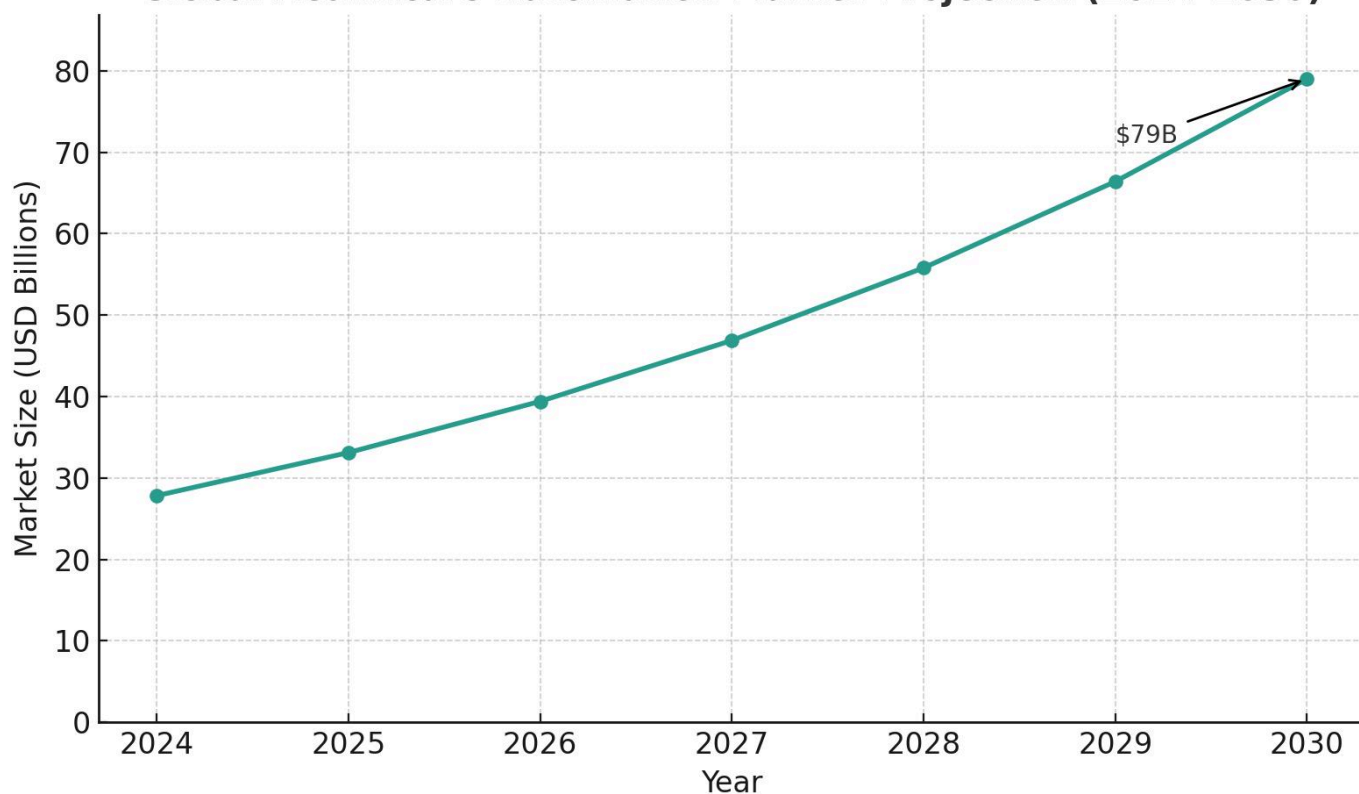

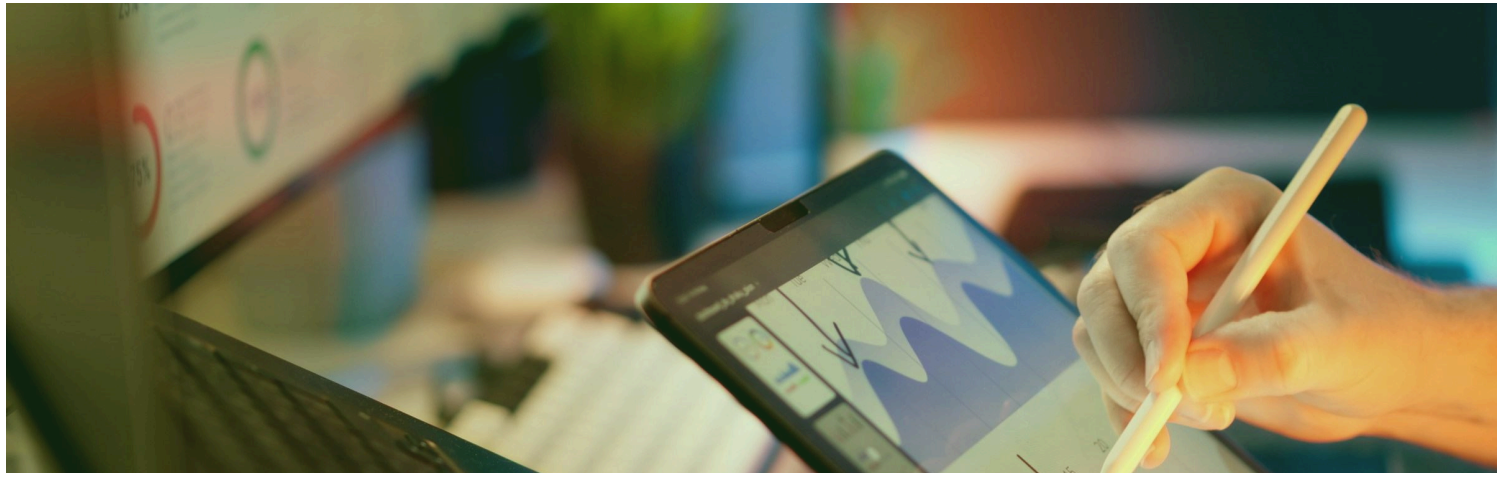

# Industry Statistics & Market Snapshot

## Automation in Healthcare

**Global Healthcare Automation Market Projection (2024-2030)**

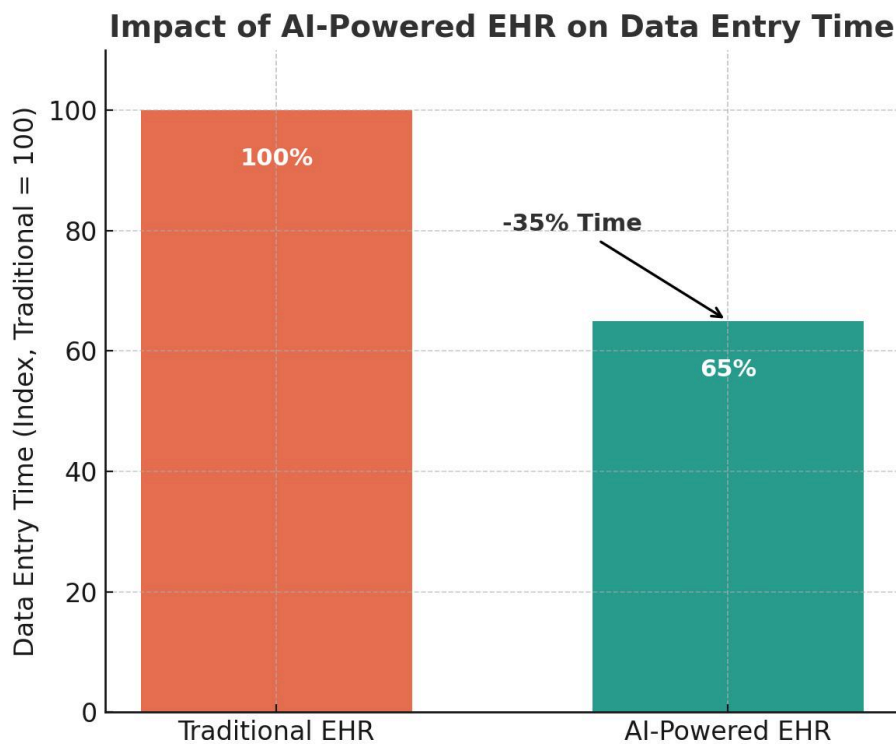

- The global healthcare automation market is projected to reach £79 billion by 2030, growing at ~19% CAGR (Deloitte).
- Over 85% of healthcare providers have adopted at least one cloud-based automation platform for patient care or operations (McKinsey).
- AI-driven automation solutions in healthcare can reduce administrative costs by up to 30% and improve patient outcomes with 20% more accurate diagnostics (PwC).

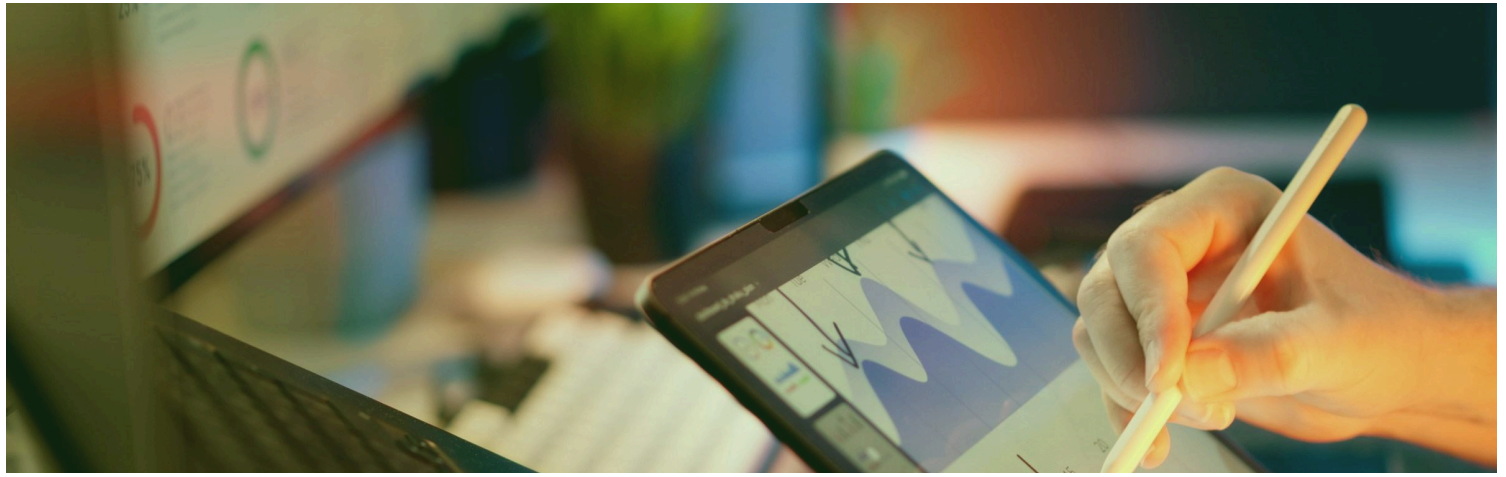

# Industry Statistics & Market Snapshot

## AI & Automation Impact

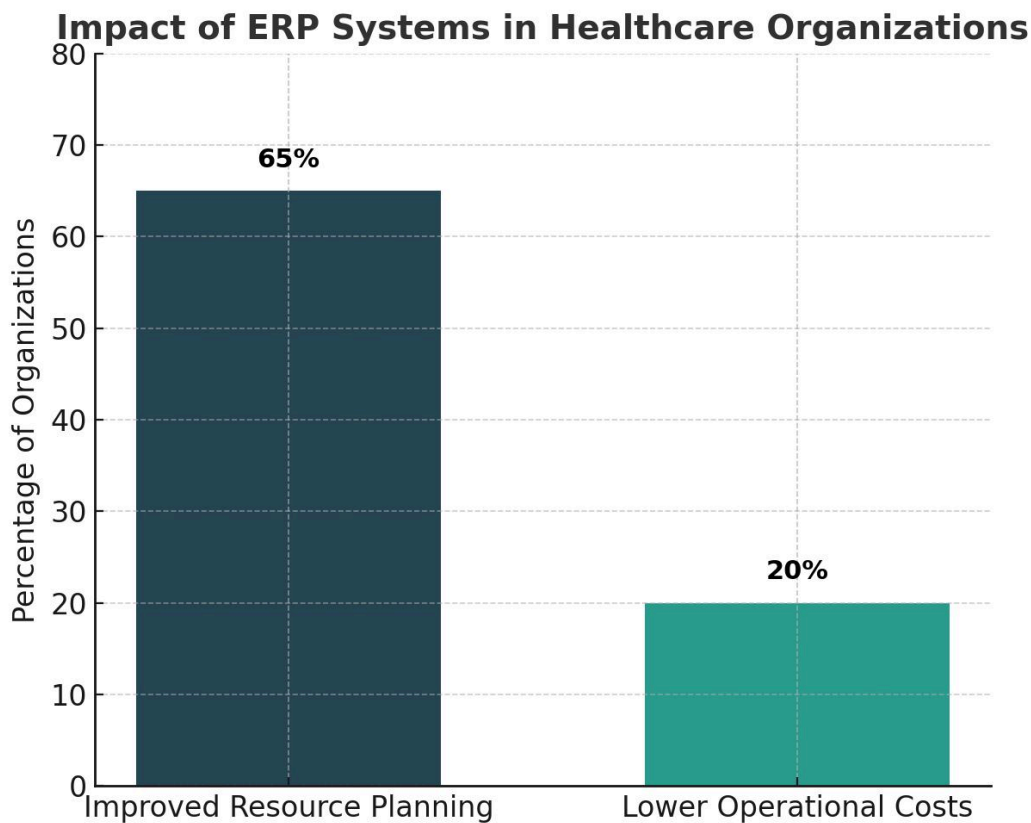

- Electronic Health Records (EHRs) powered by AI reduce data entry time by 25–40%, improving physician productivity.
- RPA bots in healthcare billing cut claim denials by up to 30%, saving providers millions annually.
- Predictive AI tools help reduce hospital readmission rates by 15–20% (Harvard Business Review).

# Industry Statistics & Market Snapshot

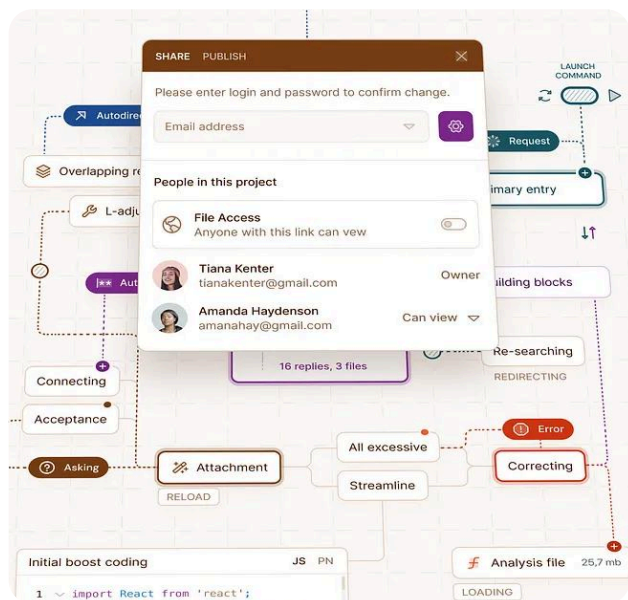

## ERP in Healthcare

- 65% of healthcare organisations using ERP report improved resource planning and 20% lower operational costs.
- Cloud ERP adoption is rising, with 70% of new deployments opting for cloud over on-premise due to compliance and scalability benefits.
- Integration of ERP with AI allows for real-time patient tracking, inventory management, and compliance auditing.

# Key Pain Points in Healthcare automation & ERP

## Operational Challenges

- Fragmented systems leading to data silos and duplicate patient records.
- Manual billing and claims processes causing delays and revenue leakage.
- Limited staff efficiency due to administrative burdens.

## Compliance & Security Concerns

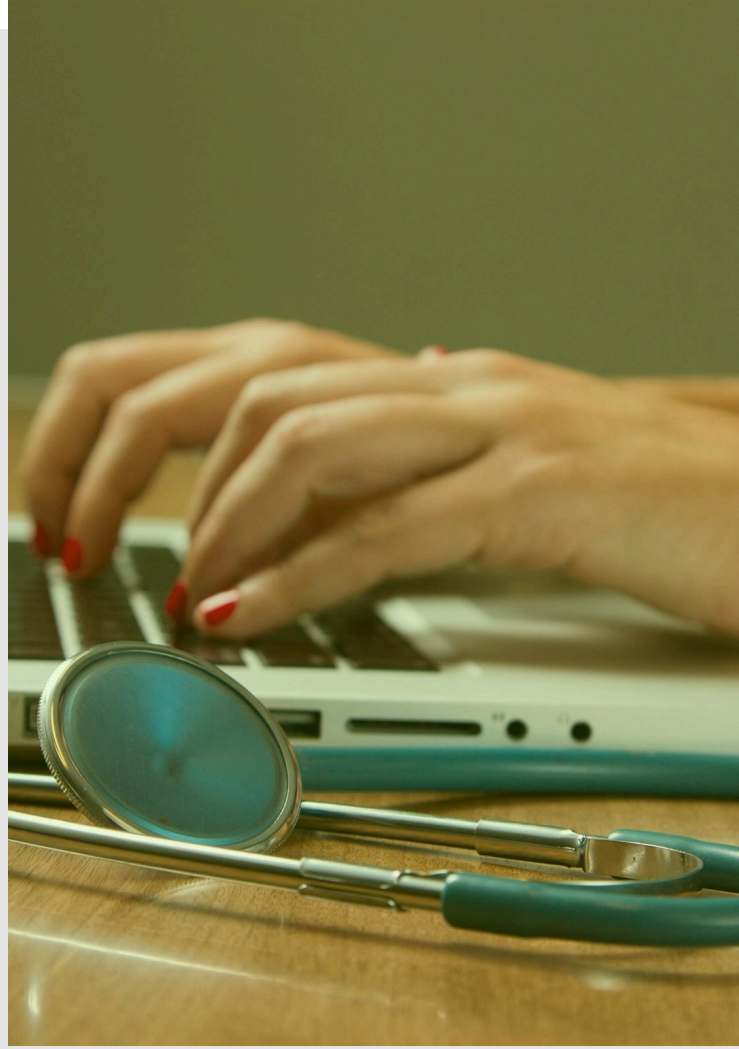

- Strict regulations such as HIPAA (US), GDPR (EU), and NDPR (Nigeria) require airtight security.
- 75% of healthcare breaches are linked to poorly managed automation systems.
- Rising threat of ransomware targeting hospital IT systems.

## Patient Experience Gaps

- Inconsistent patient communication due to unintegrated scheduling, telehealth, and billing systems.
- Lack of real-time data insights for personalised treatment.
- Poor mobile optimisation, despite 60% of patients preferring mobile-first healthcare apps.

# What We Offer: Healthcare automation Solutions

---

## 1. Healthcare ERP Suite

- Modules for EHR, billing, patient scheduling, inventory, HR, and compliance.
- HIPAA/GDPR-compliant by design.

## 3. Integration Hub

- Seamless API connections with lab systems, pharmacies, insurance portals, and telehealth platforms.

## 5. Outcome-Based Pricing

- Subscription tied to improvements in efficiency (e.g., reduced billing cycle, increased patient throughput).

## 2. AI-Powered Clinical Automation

- Predictive patient demand forecasting.
- RPA bots for claims management and appointment scheduling.
- AI chatbots for 24/7 patient triage and FAQs.

## 4. Compliance & Security Suite

- Continuous monitoring for HIPAA compliance.
- Automated audit trail generation.
- End-to-end encryption and anomaly detection AI.

# Case Studies

---

# WellCare Hospitals

## Challenges:

- High rate of claim denials (28%).
- Administrative staff spending 40% of time on manual data entry.
- Fragmented patient scheduling system.

## Solution:

- Deployed ERP suite with AI-driven claims automation.
- Integrated patient scheduling with automated reminders.

## Results:

- Claim denial rate dropped to 9%.
- Administrative workload reduced by 35%, freeing time for patient care.
- Patient no-show rates reduced by 20%.

**ROI:** Achieved in 10 months, saving ~£1.2M annually.

# Cityline Clinics Network

## Challenges:

- Inconsistent compliance documentation across branches.
- Inventory shortages for critical supplies like vaccines.
- Delayed financial reporting.

## Solution:

- Cloud ERP with AI inventory forecasting and compliance dashboard.
- Automated alerts for expiring supplies and missing audit logs.

## Results:

- Vaccine wastage reduced by 25%.
- Compliance reporting time cut from 2 weeks to 3 days.
- Operational costs lowered by 18%.

**ROI:** System paid back within 8 months.

# MedBridge Telehealth

## Challenges:

- Patients complained about poor digital appointment experience.
- Lack of real-time monitoring for chronic disease management.

## Solution:

- Integrated ERP + AI-powered telehealth module.
- Patient mobile app with AI triage and remote monitoring.

## Results:

- Patient satisfaction score improved by 32%.
- Readmission rates reduced by 15% among chronic patients.
- Mobile engagement grew by 47% in first 6 months.

# Go-to-Market Tactics for Healthcare

## Target Segments

- Mid-to-large hospitals seeking cloud ERP modernisation.
- Outpatient clinics & telehealth providers expanding digital care.
- Healthcare networks requiring regulatory compliance & multi-site management.

## Messaging & Positioning

- “Empowering healthcare providers with AI-driven ERP to cut costs, save lives, and stay compliant.”
- Highlight patient-first outcomes, not just back-office efficiency.
- Focus on compliance assurance and security-first design.

## Lead Generation Channels

- Healthcare webinars with compliance officers and CIOs.
- Case study-driven whitepapers on AI in hospital efficiency.
- Partnerships with healthcare associations and insurance networks.
- Free 90-day pilot for claims automation or scheduling automation.

## Customer Success & Retention

- Dedicated healthcare success managers for compliance audits.
- Quarterly ROI reviews tied to patient throughput, claim approval rates, and staff efficiency metrics.
- AI-driven insights dashboards shared with hospital leadership.

# Summary Table

Area	Healthcare Insight
Market Growth	Healthcare automation to hit £79B by 2030; AI & ERP adoption rising sharply
Pain Points	Compliance, billing inefficiencies, fragmented patient data, ransomware risk
We Deliver	HIPAA/GDPR-compliant ERP, AI claims automation, predictive inventory & scheduling
Fictional Wins	Claim denial ↓70%, compliance reporting faster, patient satisfaction +32%
Go-to-Market	Webinars, compliance-driven content, insurance & healthcare association alliances
